

MMM launches genomic lab

DC CORRESPONDENT

CHENNAI, NOV. 16

The Madras Medical Mission has collaborated with a genomics based diagnostics and research company, MedGenome, to set up a genomic laboratory that serves all clinical and diagnostic research purposes.

The facility aims to provide effective solution for genetic testing and counselling for various diseases including cardiac, oncology, neurology, nephrology, diabetes, dermatology, haematology, connective tissue and metabolic disorders.

“The facility is an extension to the multi-disciplinary services offered by us to provide world-class healthcare and to engage in state-of-the-art technologies,” said Dr Mullasari Ajit S, Director — Cardiology, MMM. The research and diagnostic lab will offer Next-Generation Sequencing based genomic solutions to provide insights into complex diseases at the genetic and molecular level.
