Cartagenia Partners with MedGenome for Access to Cancer Variant Database

Jan 22, 2015 | [a GenomeWeb staff reporter](#)

NEW YORK (GenomeWeb) – Genomic informatics firm Cartagenia today announced a partnership to integrate MedGenome's OncoMD Cancer database of clinically actionable cancer variants into its Bench NGS software platform.

MedGenome's OncoMD is a cancer analytics platform that includes proprietary, curated data on 1.7 million cancer mutations, containing relevant functional information, data on drug sensitivity, and lists of potential clinical trials for patient enrollment.
