The topic of this event was "Unzipping the Human Genome for Application". The MedGenome Scientific Affairs team spoke about the various applications of genomics to medicine and how clinical practice benefits from it. The entire range of genetic tests offered by MedGenome, over various disease areas such as cardiology, oncology, ophthalmology, and neurology, among others were showcased. The meeting also discussed about interpreting the clinical reports in a way that can be helpful to the clinicians in their practice.

Dr. Sophia Rodrigues, a gynaecologist and IVF specialist at Manipal Hospital, Panjim, said, "*The MedGenome Non-invasive test is very useful. It helps reduce unnecessary invasive procedures and is available in Goa as well.*"

Dr. Jacob George, an oncologist at Manipal and Dr. Prabhudesai, a cardiologist, were among the participants at the meeting.
