MedGenome Gets \$4M For Cancer Diagnostics

San Francisco-based [MedGenome](#), which is using genetic information in India to better treat cancer in that country and elsewhere, has raised \$4M in a Series A funding. The company said the funding was led by Papillon Capital and Emerge

Venture, and also included individuals such as Dmitri Mehlhorn (Bloomberg BNA Legal), Ambiga Dhiraj (MuSigma), Tim McLaughlin (Siteworx), and Dan Peterson (CASHNet). The company is using DNA sequencing and data analytics to help with cancer diagnostics and oncology.
